Professional Summary

Detail-oriented and proactive BTech Computer Science student specializing in Cloud Computing and Virtualization, with hands-on experience in virtual environments. Skilled in Python, Java, SQL, VMware, and Power BI, with strong foundations in data analysis, machine learning, and database management. Completed a summer internship at Orbit Techsol, modernizing client IT infrastructures and optimizing virtual environments. A quick learner and effective communicator, demonstrating leadership and teamwork through event coordination and student representation roles.

Skills

- **Programming Languages**: Proficient in C, Python, Java, and MySQL
- **Cloud Computing & Virtualization:** Familiar with Amazon Web Services (AWS), VMware vSphere/ESXi, and cloud infrastructure
- **Data Science & Analytics:** Experienced in Python and SQL for data analysis, Power BI for visualization, and machine learning applications
- **Software Proficiency**: Microsoft Office Suite (Word, Excel, PowerPoint)
- **Soft Skills**
  - Strong problem-solving and analytical skills
  - Effective communication and teamwork abilities
  - Adaptability and quick learning in new technologies
  - Time management and organizational skills

Internships

Obit Techsol| Summer Intern *May-2025 – July-2025*

- Modernized client's IT infrastructure by optimizing virtual environments, resolving networking, storage, and configuration issues, and improving system performance.
- Tools/Technologies used**:** VMware vSphere, ESXi, vCenter

Projects

SmartHireX – AI-Powered Online Job Portal

Tools/Technologies Used: Python, SQL, HTML, Database Management

• Developed an AI-based job matching system to provide personalized job recommendations to users.
• Implemented user authentication, designed a responsive UI, and optimized the database schema for efficient data handling.

AWS Cloud VM Deployment

Tools/Technologies Used: AWS EC2, AMI, Security Groups, Key Pairs, SSH

• Launched and configured an Amazon EC2 virtual machine using an appropriate AMI for cloud-based deployment.
• Deployed custom applications and services on the virtual machine while managing performance and uptime.
• Configured SSH access, firewall rules, and storage volumes to ensure secure and scalable deployments.
• Demonstrated understanding of cloud networking, instance management, and resource optimization.

Certifications

• Ethics in Engineering Practice	NPTEL	2025
• Fundamentals of AWS	AWS Academy	2025
• Java Fundamentals	Oracle Academy	2025
• Java Foundation	Oracle Academy	2024
• Cloud Computing & DBMS using SQL & Python	UI EDUCON	2024

Co-Curricular Activity

- DEEKSHARAMBH'25 Orientation program – *Event Coordinator, Anchor* *Sharda University, 2025*
  Led 40+ students to deliver 12 performances within 2 hours of stage time, ensuring smooth execution.
- Student Placement Representative (SSCSE) *Sharda University, 2025*

Education

Btech Cse (Cloud Computing and Virtualization)	Sharda University	*2023–2027*
Intermediate	Vishwa Bharati Public School, Noida	*2021–2023*
High School	Vishwa Bharati Public School, Noida	*2019-2021*
